Pediatr Cardiol 13:279–286, 1992

Subject Index

Abbreviations: (A) Abstract, (CR) Case Report, and (LE) Letter to the Editor.

AV, atrioventricular; ASD, atrial septal defect; AVSD, atrioventricular septal defect; CHD, coronary heart disease; LV, left ventricle or left ventricular; MRI, magnetic resonance imaging; RV, right ventricle or right ventricular; TGA, transposition of great arteries; VSD, ventricular septal defect

Acute renal failure, following cardiac surgery, mortality rate of; 208
  open heart surgery and; 30
Adrenoreceptors, effect of beta-adrenergic blockers on (A); 261
Afterload, related to velocity of circumferential fiber shortening; 141
  RV, LV diastolic function during (A); 247
Amiodarone, therapy of intractable atrial flutter in premature hydropic neonate (CR); 227
Anemia, in children following heart transplantation (A); 250
Angiography, aortic regurgitation caused by absence of aortic cusp shown by (CR); 122
  digital subtraction, pulmonary arterial supply in pulmonary atresia assessed by (A); 254
  edge enhancement, in congenital heart disease (A); 249
  incidence and mortality rate of congenital heart defects diagnosed by; 159
  magnetic resonance, reconstruction of cardiovascular system and (A); 248
Anomalous left coronary artery, associated with persistent ductus arteriosus (CR); 97
Anomalous pulmonary venous connection, total, persistence and atresia of common pulmonary vein (CR); 187
Anomalous pulmonary venous drainage, associated with cor triatriatum (CR); 125
  into myocardium-encircled saccular confluence (CR); 187
Anorexia nervosa, heart failure secondary to hypomagnesemia in (LE); 241
Antiarrhythmic agents, intractable atrial flutter treated by (CR); 227
Aortic arch, distal displacement of left subclavian artery from; 164
  interrupted, study of infants with; 214
Aortic coarctation, associated with hypertension (CR); 33
  associated with persistent fifth aortic arch (CR); 104
  combined with tetralogy of Fallot (CR); 37
  distal displacement of left subclavian artery associated with; 164
  echocardiography of mitral valve abnormalities in (A); 252
  mitral valve in children with (A); 263, 273
Aortic involvement, in Gaucher's disease (CR); 56
Aortic isthmus, fetal, changes in placental resistance on flow dynamics of (A); 259
Aortic regurgitation, absence of aortic valve cusp (CR); 122
  aortic valvuloplasty for (A); 266
Aortic root, echocardiographic evaluation of; 20
Aortic valve
  bicuspid, part of congenital cardiovascular malformation (A); 252
  role of age in balloon dilation of (A); 250
Aortic valve cusp, absence of, cause of aortic regurgitation in infancy (CR); 122
Aortic valve stenosis, aortic incompetence after repair of (A); 249
  aortic valvotomy as treatment for; 5
  balloon aortic valvoplasty as treatment for in early infancy (A); 268
  balloon dilation as treatment for in early infancy (A); 268
  study of natural survival of children with; 152
  supravalvar, reduction in severity of obstruction during childhood (CR); 170
Aortic valvotomy, LV function and myocardial mass after; 5
Aortic valvuloplasty, for aortic regurgitation secondary to leaflet prolapse (A); 266
Aortography, end on, to identify coronary arteries in tetralogy of Fallot (A); 247
Aortotomy, coarctation of the aorta acquired after (CR); 33
Arrhythmias, after Fontan anastomosis, incidence and predictive factors for (A); 254
Arterial ducts, angioplasty of (A); 256
  catheter occlusion of (A); 269
  implants for maintenance of (A); 269
  occlusion with one or two umbrella devices (A); 256
  occlusion with Rashkind umbrella device (A); 258
  stent implantation versus balloon dilation for maintenance of (A); 269
Arteritis, necrotizing, in uncorrected tetralogy of Fallot with pulmonary atresia (CR); 233
Asplenia syndrome, long-term followup of patients with (A); 267
Asymmetric septal hypertrophy (ASH), associated with mucopolysaccharide storage disease (CR); 107

Atrial flutter, after Fontan anastomosis (A); 254
in hydropic neonate, amiodarone therapy for (CR); 227
pacing with steroid eluting endocardial pacing lead (CR); 44
Atrial pacing, effect of increase in heart rate by; 146
Atrial repair, RV dysfunction after (A); 258
Atrial septal defect, effect of increase in heart rate on interatrial shunt in; 146
ostium secundum, associated with congenital mitral valve and LV malformations (A); 263
pediatric versus adult patients (A); 266
predictive factors for (A); 257
secundum, echocardiographic and surgical findings (A); 272
Atrioventricular block, following balloon pulmonary valvuloplasty (CR); 181
pacing with steroid eluting endocardial pacing lead (CR); 44
transient third-degree, in child with familial dysautonomia (CR); 184
treated with corticosteroids (CR); 181
Atrioventricular canal defect, effect of enalaprilat on children with; 129
mitral valve reconstruction in (A); 265
surgical repair in Down's syndrome patients; 80
Atrioventricular pathways, catheter ablation of by radiofrequency current (A); 257
Atrioventricular septal defect, anterolateral muscle bundle of LV in (LE); 192
bidirectional Glenn anastomosis as adjunct to repair of (A); 266
mitral valve configuration after repair of (A); 264
study of natural survival of children with; 152
Bacterial endocarditis, in children, diagnosis, course, and prognosis of; 198
with acute mitral regurgitation caused by *Fusobacterium necrophorum* (CR); 230
Balloon angioplasty, pulmonary artery and superior vena caval stenoses treated by; 92
recoarctation of the aorta treated by (CR); 104
Balloon atrial septostomy, in children with congenital heart disease (A); 250
transesophageal echocardiographic guidance of (CR); 176
Balloon dilation, for arterial duct patency (A); 269
of aortic valve, role of age in (A); 250
of congenital aortic valve stenosis, carotid approach (A); 268
Balloon mitral commissurotomy, results of (A); 273, 274
Balloon pulmonary valvuloplasty, development of complete AV block following (CR); 181
palliative role in children with tetralogy of Fallot (A); 257
using carbon dioxide as contrast agent (A); 250
valve regurgitation and (A); 255
Beta-adrenergic blockers, effect on adrenoreceptors in postoperative care (A); 261
Body position, effect on RV dimensions; 136
Bone marrow transplant, for acute leukemia, cardiotoxicity of (A); 271
hypertrophic cardiomyopathy treated by (CR); 107
Brain death, associated with asymptomatic subclavian steal syndrome following Fontan procedure (CR); 100
Captoril, heart failure caused by congenital heart disease treated by (A); 245
Carbon dioxide production, after open heart surgery (A); 249
Cardiac catheterization, countercurrent aortography as alternative to; 10
in children with and without Down's syndrome after AV surgical repair; 80
incidence and mortality rate of congenital heart defects diagnosed by; 159
oxygen consumption in children during (A); 247
Cardiac dysfunction, chloramphenicol toxicity and (CR); 48
Cardiac output, enoximone for treatment of (A); 270
extracorporeal fluid removal by ultrafiltration/hemofiltration to correct (A); 246
measured by dual-beam and pulsed Doppler echocardiography (A); 260
Cardiac pacing, in children (A); 253
Cardiac surgery, asymptomatic subclavian steal syndrome in children following (CR); 100
central venous catheterization in; 14
complicated by acute renal failure, mortality rate of; 208
extracorporeal fluid removal after (A); 246
for tetralogy of Fallot, long-term outcome (A); 259
heart transplantation to recipients with heart malformation (A); 243
of complete AV canal defect, effect of Down's syndrome on; 80
oxygen consumption and carbon dioxide production after (A); 249
oxygen deficit during constant load exercise after (A); 261
rehabilitation of children after (A); 262
ultrasonographic brain changes in infants after (A); 260
Cardiac tumor, infantile, treated with steroid therapy (CR); 52
Cardiomyopathy, hypertrophic, in mucopolysaccharide storage disease (CR); 107
idiopathic dilated, history and prognosis factors (A); 258
in infancy, epidemiologic study of; 65
restrictive, study of (A); 258

Cardiotoxicity, of bone marrow transplant for acute leukemia (A); 271
Cardiovascular malformations, epidemiologic study of; 65
Cardiovascular system, magnetic resonance angiography and reconstruction of (A); 248
Carditis, rheumatic, association between human leukocyte allo-antigen (HLA)-DR4 and; 204
Catheter ablation, of accessory AV pathways by radiofrequency current (A); 257
Central venous catheterization, in CHD patients; 14
Chloramphenicol toxicity, severe cardiac dysfunction and (CR); 48
Cholesterol, survey of management of; 76
Coarctation of the aorta, acquired, hypertension and (CR); 33
associated with persistent fifth aortic arch (CR); 104
combined with tetralogy of Fallot (CR); 37
distal displacement of left subclavian artery associated with; 164
echocardiography of mitral valve abnormalities in (A); 252
LV diastolic dysfunction after repair of (A); 248
mitral valve in children with (A); 263, 273
persistent LV hypertrophy after repair of (A); 247
study of natural survival of children with; 152
Color flow imaging, fistula between left circumflex coronary artery and left atrium diagnosed by (CR); 178
for evaluation of congenital pulmonary vein stenosis (CR); 112
Common pulmonary vein, persistence and atresia of (CR); 187
Conduction system, diffuse impairment of repaired with pacemaker (CR); 44
Congenital cardiovascular anomalies, long-term followup of (A); 267
Congenital heart defects, identification of gene mutation responsible for in mouse strain (A); 261
in Down's syndrome; 80
probability of natural survival of children with; 152
study of incidence and mortality rate of; 159
sudden death following treatment for (CR); 116
Congenital heart disease, anomalous left coronary artery (CR); 97
atrial septostomy by percutaneous balloon dilation in (A); 250
bacterial endocarditis in children with; 198
biplane intraoperative transesophageal echocardiography in (A); 260
cardiomyopathy in infancy; 65
central venous catheterization in patients with; 14
comparison of studies of (A); 254
cor triatriatum sinistrum; 85
development of left atrial ball thrombus in patient with (CR); 173
edge enhancement angiography in (A); 249
in infants, grading severity of; 72
in neonate, surgical repair (CR); 37
long-term followup after open heart surgery for (A); 258
MRI features of pulmonary hypertension in children with (A); 254
probability of natural survival of children with; 152
study of incidence and mortality rate of; 159
sudden death following treatment for (CR); 116
therapeutic embolizations in (A); 255
unrecognized, death in infancy caused by (A); 253
use of captoril in treating heart failure caused by (A); 245
windsock diverticulum (CR); 59
Congestive heart failure, anomalous left coronary artery from main pulmonary trunk (CR); 97
cor triatriatum sinistrum; 85
in infants, grading severity of; 72
Converting enzyme inhibitors, hemodynamic effects of; 129
Cor triatriatum sinistrum, associated with total anomalous pulmonary venous drainage (CR); 125
clinical and anatomical analysis of; 85
noninvasive imaging for early recognition of (A); 267
Coronary arteries, anomalous, identified by "end on" aortogram (A); 247
Coronary artery dysplasia, imperforate tricuspid valve and; 24
Coronary artery fistula, between left circumflex and left atrium (CR); 178
Coronary artery thickening, association with family history of coronary heart disease (A); 268
Coronary heart disease, intimal thickening of coronary arteries and family history of (A); 268
Corticosteroids, complete AV block treated with (CR); 181
Countercurrent aortography, alternative to cardiac catheterization; 10
Cyanosis, after catheter embolization of pulmonary arteriovenous fistulas (CR); 41
Dobutamine, as treatment for heart failure, hemodynamic effects of (A); 246
Dobutamine stress test, cardiac function in childhood cancer survivors treated with doxorubicin assessed by (A); 246
Dopamine, as treatment for heart failure, hemodynamic effects of (A); 246
Doppler echocardiography
changes in main pulmonary artery in systolic murmurs (A); 252

differences in treatment for acute lymphoblastic and myoloid leukemias shown by (A); 251
fetal diastolic function (A); 251
fistula between left circumflex coronary artery and left atrium diagnosed by (CR); 178
for assessing LV function; 5
for evaluation of congenital pulmonary vein stenosis (CR); 112
versus dual beam (A); 260
Down's syndrome, AV septal defect in patients with (LE); 192
effect of enalaprilat on children with; 129
effect on surgical correction of complete AV canal; 80
Doxorubicin, cardiac function in childhood cancer survivors treated with (A); 246
Ductal stenting, palliation of hypoplastic left heart syndrome (A); 256
Ductus arteriosus, aneurysm of in neonate (CR); 222
persistent, associated with anomalous left coronary artery (CR); 97
study of natural survival of children with; 152
Dysautonomia, familial, transient third-degree AV block in child with (CR); 184
Dyslipidemia, survey of management of; 76
Echocardiography, aneurysm of ductus arteriosus diagnosed by (CR); 222
aortic root and mitral valve evaluated by; 20
as diagnosis of rejection following heart transplantation (A); 244
changes in main pulmonary artery in systolic murmurs (A); 252
congenital aortic regurgitation from absence of aortic cusp shown by (CR); 122
cor triatriatum sinistrum diagnosed by; 85
diagnosis of bacterial endocarditis in children with; 198
distal displacement of left subclavian artery associated with aortic coarctation shown by; 164
Doppler, differences in treatment for acute lymphoblastic and myoloid leukemias shown by (A); 251
Doppler, dual beam versus pulsed (A); 260
Doppler, fistula between left circumflex coronary artery and left atrium diagnosed by (CR); 178
Doppler, for assessing LV function; 5
Doppler, right heart pressure estimation validation by (A); 272
Doppler, RV relaxation and diastolic filling studied by (A); 271
double-chambered right ventricle diagnosed by (A); 271
fetal diastolic function (A); 251
followup of catheter occlusion of patent arterial duct (A); 269
intracardiac calcifications in pseudohypoparathyroidism diagnosed by (CR); 237
mitral and aortic lesions evaluated by (CR); 56
mitral valve in children with aortic coarctation analyzed by (A); 263
mitral valve prolapse diagnosed by (A); 273
of mitral valve abnormalities in coarctation of the aorta (A); 252
of secundum ASD (A); 272
pulmonary vein stenosis evaluated by (CR); 112
study of effects of respiration on RV size and function; 136
tetralogy of Fallot studied by (A); 272
transesophageal, as guidance for balloon atrial septostomy (CR); 176
transesophageal, biplane, longitudinal versus transverse plane (A); 259
transesophageal, biplane intraoperative, in CHD (A); 260
transesophageal, intraoperative and postoperative (A); 272
Embolization, catheter, of pulmonary arteriovenous fistulas (CR); 41
percutaneous transcatheter, in CHD (A); 257
Enalapril, in children, study of (A); 245
Enalaprilat, hemodynamic effects of; 129
End-systolic wall stress (ESS), related to velocity of circumferential fiber shortening; 141
Enoximone, for treatment of refractory low cardiac output (A); 270
Epidemiology, of cardiomyopathy in infancy; 65
Extracorporeal membrane oxygenation, LV performance in neonates on; 141
Fetus, prognosis of tetralogy of Fallot in; 1
Fixed subaortic stenosis, long-term postoperative results (A); 253
study of management of (A); 267
Fontan anastomosis, arrhythmias after (A); 254
Fontan procedure, brain death in subclavian steal syndrome child following (CR); 100
pulmonary artery size and (A); 262
Fusobacterium necrophorum, bacterial endocarditis with acute mitral regurgitation cause by (CR); 230
Gaucher's disease, mitral and aortic involvement in (CR); 56
with mitral valve calcification (LE); 127
Genetic factors, role in predisposition to development of rheumatic fever; 204
Gore-Tex prosthesis, versus fresh frozen vein homograft for systemic pulmonary shunts (A); 253
use of aspirin and (A); 268
Gray baby syndrome, complication of chloramphenicol toxicity (CR); 48

Hashimoto's thyroiditis, mitral valve prolapse and; 89
Heart block, isolated, significance of maternal SS-A in children with (A); 255
Heart failure, after repair of tetralogy of Fallot, treatment for (A); 246
angioplasty of arterial ducts in neonates with (A); 256
secondary to hypomagnesemia in anorexia nervosa (LE); 241
use of captoril in treating (A); 245
Heart malformation, congenital, bicuspid aortic valve as part of (A); 252
congenital, surgical problems in heart transplantation to recipients with (A); 243
in fetal rat associated with trichloroethylene in drinking water (A); 249
Heart rate, effect of increase in on hemodynamics; 146
in preterm infants (A); 266
Heart transplantation, anemia in children after (A); 250
congenital heart malformation in recipients (A); 243
echocardiography for diagnosing rejection following (A); 244
in children, compared with adults (A); 233
in children, new aspects in (A); 233
in children, use of steroids as maintenance immunosuppressive therapy after (A); 244
in infants, heterotopic (A); 251
infections in (A); 251
rehabilitation and long-term prognosis after (A); 244
results and followup (A); 270
status of innervation in (A); 270
Heart-lung transplantation, versus isolated lung transplantation to treat Eisenmenger's disease (A); 244
Hemangioendothelioma, infantile, treated with steroid therapy (CR); 52
Hemodynamic effects, of converting enzyme inhibition with intracardiac shunts; 129
of increase in heart rate by atrial pacing; 146
of peritoneal dialysis following open heart surgery; 30
Human leukocyte allo-antigen (HLA), rheumatic fever and; 204
Human recombinant erythropoietin, treatment for anemia after heart transplantation (A); 250
Hydrops fetalis, amiodarone therapy of intractable atrial flutter in (CR); 227
Hypercholesterolemia, lipoprotein profiles in children with (A); 248
Hypertension, acquired coarctation of the aorta and (CR); 33
effect of enalaprilat on children with; 129
pulmonary, caused by absence of right pulmonary artery (CR); 119
pulmonary, caused by uncorrected tetralogy of Fallot (CR); 233
pulmonary, in congenital heart disease (A); 245
pulmonary, morphometric techniques in evaluating (A); 265
pulmonary, MRI features of (A); 254
Hypomagnesemia, in anexoria nervosa, heart failure secondary to (LE); 241
Hypoplastic left heart syndrome, palliation of (A); 256
Ibopamine, as treatment for intractable heart failure in children (A); 245
Idiopathic dilated cardiomyopathy, history and prognosis factors (A); 258
Imperforate tricuspid valve, dysplasia of RV myocardium, pulmonary valve, and coronary artery and; 24
Inferior vena cava thrombus, in infants with TGA (LE); 240
Interatrial shunt, effect of increase in heart rate on; 146
Intracardiac calcifications, pseudohypoparathyroidism type Ia and (CR); 237
Intracardiac shunting, effect on oxygen consumption (A); 247
hemodynamic effects of enalaprilat on children with; 129
Juvenile autoimmune thyroiditis, mitral valve prolapse and; 89
Left atrial ball thrombus, mitral valve stenosis and development of (CR); 173
Left atrial membrane, in cor triatriatum sinistrum; 85
Left heart obstructive lesions, angioplasty of arterial ducts in neonates with (A); 256
Left subclavian artery, aortic coarctation and distal displacement of; 164
Left ventricle, anterolateral muscle bundle of (LE); 192
malformations of (A); 263
performance in neonates on extracorporeal membrane oxygenation; 141
Left ventricular function, after aortic valvotomy; 5
diastolic, after coarctation repair (A); 248
diastolic, during acute RV afterload increase (A); 247
diastolic, in children treated for leukemias (A); 251
Left ventricular hypertrophy, after coarctation repair (A); 247
Left ventricular outflow obstruction, in monozygotic twin, reduction of during childhood (CR); 170

Leukemias, cardiotoxicity of bone marrow transplant for treatment of (A); 271
LV diastolic dysfunction in children treated for (A); 251
Lipoprotein profiles, in children with hypercholesterolemia (A); 248
Lung transplantation, isolated, versus heart-lung transplantation to treat Eisenmenger's disease (A); 244
Magnetic resonance angiography, reconstruction of cardiovascular system and (A); 248
Magnetic resonance imaging, in supravalvular pulmonary stenosis after arterial switch operation (A); 260
of pulmonary hypertension in children with CHD (A); 254
Marfan's syndrome, compared with patients with isolated pectus excavatum; 20
Mitral orifice, study of disease in (A); 264
Mitral valve, bacterial endocarditis and rupture of (CR); 230
calcification, in Gaucher's disease (LE); 127
configuration after repair of complete AVSD (A); 264
congenital, associated with ostium secundum ASD or abnormal pulmonary venous drainage (A); 263
congenital, functional classification of insufficiency (A); 263
developmental pathology of (A); 260
echocardiographic evaluation of; 20
echocardiography of abnormalities in (A); 252
in children with aortic coarctation, echocardiographic analysis of (A); 263
in children with aortic coarctation, size of (A); 273
prolapse, echocardiographic diagnosis of (A); 273
prolapse, juvenile autoimmune thyroiditis and; 89
stenosis, development of left atrial ball thrombus in patient with (CR); 173
stenosis, functional classification of (A); 263
Mitral valve atresia, cor triatriatum associated with total anomalous pulmonary venous drainage in setting of (CR); 125
Mitral valve insufficiency, functional classification of (A); 263
in infancy, associated with anomalous left coronary artery (CR); 97
Mitral valve involvement, in Gaucher's disease (CR); 56
Mitral valve reconstruction, in total AV canal (A); 265
long-term followup (A); 264
Mitral valve replacement, long-term followup (A); 264
Mortality rate, of children with bacterial endocarditis; 198
of children with Down's syndrome and surgical repair of AV canal; 80
infant, of CHD; 152
of congenital heart defects diagnosed by angiohemodynamic methods; 159
surgical, complicated by acute renal failure; 208
surgical, isolated VSD and; 193
Mucopolysaccharide storage disease (MPS), hypertrophic cardiomyopathy in (CR); 107
Murmurs, systolic, echocardiography of main pulmonary artery and branches in newborns with (A); 252
vibrant innocent, origin of (A); 271
Neonatal brain injury, transient ventricular septal hypertrophy and (LE); 63
Open heart surgery, hemodynamic effects of peritoneal dialysis following; 30
for CHD, long-term followup (A); 258
peritoneal dialysis following (A); 274
Oxygen consumption, after open heart surgery (A); 249
in children after cardiac surgery (A); 262
in children during cardiac catheterization (A); 247
in children during constant load exercise after cardiac surgery (A); 261
Pacemaker, used in sick sinus syndrome and diffuse impairment of conduction of system (CR); 44
Palliation, pulmonary atresia with intact ventricular septum treated by (CR); 110
Pectus excavatum, isolated, aortic root and mitral valve evaluation in patients with; 20
Peritoneal dialysis, acute renal failure following cardiac surgery treated by; 208
following open surgery in children (A); 274
hemodynamics effects of; 30
Persistent fifth aortic arch, associated with coarctation of the aorta (CR); 104
Pneumonectomy, as treatment of cardiac failure from absence of right pulmonary artery (CR); 119
Polysplenia syndrome, long-term followup of patients with (A); 267
Preterm infants, heart rate and rhythm in (A); 266
Propafenone, tachyarrhythmias treated with (A); 261
Pseudohypoparathyroidism type Ia, intracardiac calcifications in (CR); 237
Pulmonary arteriovenous fistula, catheter embolization of (CR); 41
Pulmonary artery, Fontan procedure and size of (A); 262
main, echocardiography of in newborns with systolic murmurs (A); 252
Pulmonary artery banding, palliation of hypoplastic left heart syndrome (A); 256

Pulmonary atresia, necrotizing arteritis in uncorrected tetralogy of Fallot with (CR); 233
percutaneous ductal stenting for (A); 269
with intact ventricular septum, palliative decompression of (CR); 110
with VSD (CR); 233
with VSD, pulmonary arterial supply in (A); 254
Pulmonary hypertension, caused by absence of right pulmonary artery (CR); 119
caused by uncorrected tetralogy of Fallot (CR); 233
in congenital heart disease (A); 245
morphometric techniques in evaluating (A); 265
MRI features of (A); 254
Pulmonary shunts, fresh frozen vein homograft versus Gore-Tex prosthesis for (A); 253
Pulmonary stenosis, artery, treated by balloon-expandable stents; 92
study of natural survival of children with; 152
supravalvular, MRI in (A); 260
vein, pulsed wave and color Doppler echocardiography in (CR); 112
Pulmonary valve dysplasia, imperforate tricuspid valve and; 24
Pulmonary vascular disease, associated with cor triatriatum sinistrum; 85
morphometric techniques in evaluating (A); 265
Pulmonary venous drainage, abnormal, associated with congenital mitral valve and LV malformations (A), 263
Radiofrequency current, catheter ablation of accessory AV pathways by (A); 257
Rashkind umbrella device, occlusion of arterial ducts using (A); 255, 269
Respiration, effect on RV size and function; 136
Rheumatic fever, human leukocyte allo-antigen (HLA) and; 204
Right pulmonary artery, absence of, in patient with scimitar syndrome (CR); 119
Right ventricle, double-chambered, echocardiographic diagnosis of (A); 271
effect of respiration on size and function of; 136
hypertensive, in pulmonary atresia (CR); 110
hypoplastic, bidirectional Glenn anastomosis as adjunct to repair of (A); 266
Right ventricular afterload, LV diastolic function during increase in (A); 247
Right ventricular filling, echocardiographic study of (A); 271
Right ventricular function, after atrial (mustard) repair (A); 258
Right ventricular myocardium dysplasia, imperforate tricuspid valve and; 24
Right ventricular relaxation, echocardiographic study of (A); 271
Scimitar syndrome, absence of right pulmonary artery in patient with (CR); 119
Sick sinus syndrome, pacing with steroid eluting endocardial pacing lead (CR); 44
Situs inversus, identification of gene mutation responsible for in mouse strain (A); 261
Stenosis, aortic, late aortic valve incompetence after repair of (A); 249
balloon aortic valvoplasty for (A); 268
congenital mitral valve, development of left atrial ball thrombus in patient with (CR); 173
congenital mitral valve, functional classification of (A); 263
fixed subaortic, long-term postoperative results (A); 253
fixed subaortic, management of (A); 267
pulmonary artery, treated with balloon-expandable stents; 92
pulmonary vein, pulsed wave and color Doppler findings in (CR); 112
rheumatic mitral, commissurotomy for (A); 274
superior vena caval, treated with balloon-expandable stents; 92
supravalvular pulmonary, MRI in (A); 260
Stent implantation, comparison for four types (A); 269
for maintenance of arterial duct patency (A); 269
for pulmonary atresia (A); 269
Subclavian steal syndrome, asymptomatic, brain death and (CR); 100
Subpulmonary obstruction, caused by tricuspid valve windsock malfunction (CR); 59
Sudden death, supraventricular tachyarrhythmia, CHD and (CR); 116
Superior vena caval stenosis, treated by balloon-expandable stents; 92
Supraventricular tachycardia, followed by ventricular fibrillation (CR); 116
Surgical repair, impact on mortality rate of congenital heart defects; 159
neonate with tetralogy of Fallot and coarctation of the aorta (CR); 37
of complete AV canal; 80
of cor triatriatum sinistrum; 85
of interrupted aortic arch in infancy; 214
of isolated VSD; 193
of RV outflow obstruction (CR); 59
of tetralogy of Fallot, treatment of postoperative heart failure (A); 246
Survey, of pediatric management of dyslipidemias; 76
Survival, children with CHD and probability of; 152
following peritoneal dialysis for treatment of acute renal failure after cardiac surgery; 208
following repair of tetralogy of Fallot (A); 259
role of effect of Down's syndrome on surgical correction of AV canal in; 80
Systolic murmurs, echocardiography of main pul-

monary artery and branches in newborns with (A); 252
Tetralogy of Fallot, combined with coarctation of the aorta (CR); 37
echocardiographic aspects of in early infancy (A); 272
identification of coronary arteries by aortography in (A); 247
long-term followup after repair of (A); 259
palliative role of balloon dilation in children with (A); 257
prognosis in fetal; 1
treatment of heart failure after total repair of (A); 246
uncorrected, necrotizing arteritis in (CR); 233
Thrombosis, associated with acquired coarctation of the aorta (CR); 33
Total anomalous pulmonary venous connection, persistence and atresia of common pulmonary vein (CR); 187
Trichloroethylene, in drinking water, cardiac malformation in fetal rat (A); 249
Tricuspid regurgitation, right heart pressure estimation in infants with (A); 272
Tricuspid valve windsock malfunction, RV outflow obstruction caused by (CR); 59
Tuberous sclerosis, cardiac involvement in (A); 265
Twins, monozygotic, discordance of supravalvar aortic stenosis in (CR); 170
Type A aortic interruption, associated with persistent fifth aortic arch (CR); 104
Ultrafiltration/hemofiltration, extracorporeal fluid removal by (A); 246
Ultrasonography, brain changes in infants after heart surgery assessed by (A); 260
Velocity of circumferential fiber (VCF) shortening, related to end-systolic wall stress as afterload; 141
Ventricular compliance, difference of right and left, effect on hemodynamics; 146
Ventricular fibrillation, following supraventricular tachyarrhythmia, association with sudden death (CR); 116
Ventricular mass, after aortic valvotomy; 5
Ventricular septal defect, effect of enalaprilat on patients with; 129
isolated, study of natural and modified history of; 193
pulmonary arterial supply in pulmonary atresia with (A); 254
spontaneous closure of (LE); 190
study of natural survival of children with; 152
Ventricular septal hypertrophy, neonatal brain injury and (LE); 63

Pediatr Cardiol 13:287–289, 1992
